#### Prader Staging:

0 = normal genitalia

1 = clitoromegaly

2 = clearly abnormal clitoromegaly

3 = obvious small penis

#### MDT involved:

- Endocrinologist, GP, Surgeon (paediatric urologist, gynaecologists)
- Psychologists
- Social workers
- Family

#### Active discussions:

- Gender assignment (psychosocial, fertility potential, HRT?)
- ?Surgical correction (informed decision making)

#### Prader Staging:
